

***CITY OF AVENAL AND MADERA DISPOSAL SYSTEMS, INC., KINGS COUNTY, CITY OF AVENAL SOLID WASTE LANDFILL, Kings County***

Immediately northeast of Avenal, the facility contains three existing unlined waste management units (Units) covering about 44.5 acres. The existing Units began receiving wastes in 1929 and are currently receiving wastes. The proposed expansion Unit, covering 36 acres, is proposed to be constructed east, west, and south of the existing Units. The new Unit will extend the life of the facility at least 25 years. The projected closure date of the landfill, including the expansion Units, is 2030. Surface drainage is southwesterly toward the Kettleman Plain in the Kettleman Hydrologic Area (558.50) of the Tulare Lake Basin. The waste discharge requirements are being revised for the construction of a new Unit utilizing a composite liner system. (VSM)
